

Hollow M74: Movement Intent V2

Design-contract catalogue for authored preferred range bands, soft separation, contact-buffer smoothing, and capped retreat bursts. Movement remains local: no pathfinding, no line of sight, no squad tactics, no home leash system, and no boss behavior changes.

Runtime Contract

Rule	Contract
preferred range	Applied only during ordinary chase, wander, and hold movement.
separation	Soft nudge away from nearby living non-boss enemies.
player buffer	Stops constant shoving while still allowing hits and brief overlaps.
retreat	Short 0.75s bursts, then reassess.
unchanged	Windups, charges, stun, death, entry grace, attacks, contact damage, and bosses.

Current Roster Range Table

Enemy	Preferred Min	Preferred Max	Notes
Normal Chaser	1.05m	1.75m	Loose direct pressure.
Flying Chaser	2.75m	4.25m	Prey retreat and wander band.
Fast Chaser	0.90m	1.45m	Close fast pressure.
Heavy Chaser	1.35m	2.15m	Mindless pressure with more body room.
Ash Charger	0.80m	1.35m	Instinctive predator; charge behavior unchanged.
Bone Turret	5.25m	7.50m	Stationary data envelope only.
Husk Splitter	1.25m	2.00m	Basic predator spacing.
Stone Warden Spawn	4.50m	6.50m	Data completeness only; boss unchanged.

Intelligence Precision

Instinctive enemies use bands mainly for prey behavior and anti-shove smoothing. Simple enemies are loose. Basic, Trained, Tactical, and Cunning enemies respect the authored band more cleanly.

Deferred Work

Home leash behavior, obstacle steering, pathfinding, line of sight, and squad coordination are deferred to future milestones.
