

M85: Creature Action Expansion

Body-only creatures move toward Souls-lite readable commitment. Damage remains physical-only and active-window-only; ordinary body overlap stays harmless from M79.

New Creature Roster

Enemy	Stats	Identity	Range	Action Set
Hollow Bird	3 HP 2.25m/s	Light / Simple predator	1.80-3.60m	swoop_peck, claw_dive, wing_retreat, caw_signal
Hollow Beast	5 HP 1.90m/s	Medium / Basic predator	1.15-2.10m	leap_bite, body_check, leap_back, howl_signal

Signal And Burst Rules

- Signals are same-family local stimuli only: alarm_squeal affects rats, caw_signal affects Hollow Birds, and howl_signal affects Hollow Beasts.
- Movement bursts such as swoop, strafe, skitter, leap-back, circle, and hop-back do not deal damage.
- Melee/area creature damage still uses windup, active window, and recovery. Recovery is intentionally punishable.
- No pathfinding, obstacle LOS, passive contact damage, status effects, save migration, squad navigation, or boss runtime changes are included.
