

M86: Ranged + Firearm Enemies V1

Dark Souls-inspired ranged commitment for archers, gunners, throwers, turrets, machines, and projectile pattern enemies. Damage remains physical and active-window-only; ordinary body contact remains harmless.

Runtime Contract

Profile-specific StartRangedAction choices check range before commitment. Projectile, FanProjectile, and RadialProjectile patterns spawn only at the active transition, then enter recovery. Ranged/charge budgets remain authoritative, and Tactical/Cunning intelligence only wins tie-breaks without increasing total pressure.

M87 Bridge

The same profile-driven projectile path is ready for magic, ghost, soul, curse, and area-pressure enemies later, without adding a separate caster projectile system in M86.
