

Hollow

Tomorrow Assignment Plan

Concrete outputs for Martin and Rafal

Goal

Tomorrow should produce a small but real content pack and a clearer creative direction. The target is not final quality; the target is enough integrated content and design answers that the vertical slice becomes more interesting to play and easier to develop next.

Owner	Minimum good output	Strong output	Stretch
Rafal	6-8 usable visual assets	10-14 usable visual assets	16+ assets with basic animation/VFX
Martin	2-3 integrated assets, 1 room	5-8 integrated assets, 2 rooms, 1 challenge seed	2 challenges plus M26/M27 implementation plan
Together	5 key design answers	10 key design answers	First story/identity direction locked

- Best single-day win: 10 rough assets, 2 new rooms, 1 challenge seed, 10 design answers, and 1 playable smoke test.
- Protect the M25 route: New Run, combat room, reward, boss key, boss, hub, shop card, next portal.
- All runtime-ready art must remain visual-only and be integrated through ArtPass roles.

Rafal Assignment

Rafal should focus on high-impact visuals that immediately make the slice easier to read and more atmospheric. Strong silhouettes and material direction matter more than detail.

Priority	Asset	Role / file target	Acceptance check
P1	Dark toy-diorama floor	AP_RoomFloor / RoomFloor	Readable ground plane, no gameplay collider.
P1	1m rock/block obstacle	AP_RoomObstacleRock / RoomObstacleRock	Sits visually on floor, clear blocking shape.
P1	Door state set	AP_DoorLocked, Active, Cleared, Unavailable	Each state readable at a glance.
P1	Player placeholder	AP_Player	Distinct from enemies, readable in top/3-4 view.
P2	Reward + boss key	AP_RewardPickup, AP_BossKeyPickup	Clear pickup affordance; key feels important.
P2	Enemy trio	AP_EnergyNormal, Flying, Charger	Different silhouettes and movement expectation.
P2	Turret + splitter	AP_EnergyTurret, AP_EnergySplitter	Turret reads stationary/ranged; splitter reads fragile/swarmy.
P2	Stone Warden	AP_EnergyBoss	Larger, heavy, gatekeeper silhouette.
P3	Portal/shop visuals	AP_HubShop, AP_NextBranchPortal	Shop/portal are obvious interactables.
P3	VFX pack	ProjectileFire, EnemyHit, EnemyDeath, RewardClaim, PortalComplete	Simple particles/pulses, low cost.

Recommended Rafal target: finish 10 assets total: floor, rock, four door states, player, normal enemy, boss, and reward/key/portal combo. If there is extra time, add simple idle/pulse animations for player, enemies, reward, and portal.

Rafal notes / assets completed:

Martin Assignment

Martin should integrate visible content safely, create a little more playable variety, and convert tomorrow's discoveries into the next milestone sequence.

Priority	Task	Example	Acceptance check
P1	Integrate ArtPass assets	Bind 5-8 Rafal prefabs to existing presentation roles.	Visuals appear in-game without adding gameplay colliders/scripts.
P1	Playability cleanup smoke	Camera follow, HUD layout, door readability, shop-card interaction.	M25 route remains playable and understandable.
P2	Create room 1	Split Lanes 1x1: rocks divide lanes, normal + splitter enemies.	Validates through HollowRuntime V2 and can be approved.
P2	Create room 2	Turret Chapel 2x1: wide room, turret corners, rocks as cover.	Validates and has safe start/enemy/reward/door anchors.
P2	Create challenge seed	Boss Key Rush, Turret Maze, Secret Hunter, or Splitter Swarm.	One-sentence rule plus implementation route for M27.
P3	Plan next milestones	M26 feel/physics, M27 challenge content, M28 room expansion.	Decision-ready outline for next coding session.

Recommended Martin target: integrate 5-8 visual assets, produce 2 validated room candidates, define 1 challenge, and run one manual smoke test through the locked branch route.

Martin notes / integrated content:

Shared Design Output

The shared design output should be small and decisive. Ten good answers are more useful than a hundred vague possibilities.

#	Question	Why it matters
1	Who is the player?	Shapes silhouette, abilities, narrative text, and progression.
2	What are souls?	Defines economy, rewards, morality, and meta progression.
3	Why are rooms discrete tests?	Makes the branch structure feel intentional.
4	What is the hub?	Guides shop/portal art, safety, and story tone.
5	Who runs the shop?	Creates personality and economy logic.
6	What does Stone Warden guard?	Gives the first boss meaning.
7	What are enemies emotionally?	Guides enemy art and naming.
8	What do secrets mean?	Decides whether secrets reward power, lore, risk, shortcuts, or weirdness.
9	What is the main feeling?	Keeps art, combat, and story pointed in the same direction.
10	What is next: feel, challenges, rooms, enemies, or story?	Chooses the next milestone priority.

Shared answers / decisions:

Concrete Content Examples

Use these examples if you want to move fast without rethinking the whole design during production.

Content	Description	Purpose
Split Lanes 1x1	Rocks split the room into two horizontal lanes; normal enemies pressure one lane, splitters punish tunnel vision.	Tests basic room variety and crowd readability.
Turret Chapel 2x1	Wide room with turret anchors near corners and rocks as cover pockets.	Tests ranged pressure and cover readability.
Secret Cache 1x1	Optional no-combat room with distinct material mood, reward marker, and secret door state.	Tests secret reward language.
Boss Key Rush	Short challenge branch focused on finding the key and reaching the boss quickly.	Tests challenge mode concept.
Splitter Swarm	Small rooms biased toward splitter enemies and open movement.	Tests enemy readability and crowd pressure.

If time collapses, choose one room and one challenge. Finished small content beats a giant almost-content swamp.

End Of Day Checklist

Check	Owner	Pass condition
Asset count	Rafal	At least 6 usable assets, ideally 10.
ArtPass safety	Martin	Integrated visuals have no gameplay colliders/scripts.
Room content	Martin	At least 1 validated room candidate, ideally 2.
Challenge seed	Martin + Rafal	At least 1 named challenge with one-sentence rule.
Design answers	Together	At least 5 key answers, ideally 10.
Smoke test	Martin	New Run to hub/shop path still works or issues are clearly listed.
Next milestone	Together	Choose M26, M27, M28, M29, or M30 as next priority.

Recommended final target: 10 rough assets, 2 new rooms, 1 challenge seed, 10 design answers, and 1 playable smoke test.
