

M84: Weapon-User Enemies

Souls-lite commitment for Skeleton Sword, Skeleton Spear, Knight, and Giant. Ordinary contact remains harmless; damage comes from explicit weapon arcs, area impacts, projectiles, hazards, or active boss windows.

Runtime Contract

- WeaponMelee attacks apply damage only during active frames, inside range and hit arc, once per activation.
- Behavior trees choose only the opener from idle; runtime may start one follow-up if alive, engaged, in range, and budgeted.
- Knight medium shield reduces frontal physical hits; flank/back hits bypass guard and Heavy+ hits can break guard into recovery.
- No pathfinding, obstacle LOS, squad tactics, or boss runtime changes are included in M84.
- Encounter notes: skeleton patrol, spear lane, knight shield line, giant pressure room, and mixed weapon battlefield.
