

M72: Enemy Intelligence + Instinct Disposition V1

Design contract for adding a 0-5 enemy intelligence scale and companion instinct disposition to Hollow's current roster. M72 is intentionally conservative: no pathfinding, no line of sight, no squad tactics, and no boss behavior changes.

Intelligence Scale

Value	Label	Runtime Intent
0	Instinctive	Disposition-driven creature behavior.
1	Simple	Direct pressure with little adjustment.
2	Basic	Current direct combat with modest intent support.
3	Trained	Uses authored role cleanly, especially sentinel timing.
4	Tactical	Small priority bonus and cleaner spacing.
5	Cunning	Highest V1 priority bonus without bypassing pressure caps.

Disposition Definitions

Disposition	Definition
prey	Wanders or backs away until endangered.
predator	Attacks directly without clever spacing at low intelligence.
sentinel	Holds territory and attacks when approached.
mindless	Uses simple direct or wandering pressure.

Current Base Enemy Table

Enemy	Intelligence	Disposition
Normal Chaser	1 Simple	predator
Flying Chaser	0 Instinctive	prey
Fast Chaser	1 Simple	predator
Heavy Chaser	1 Simple	mindless
Ash Charger	0 Instinctive	predator
Bone Turret	3 Trained	sentinel
Husk Splitter	2 Basic	predator
Stone Warden Spawn	2 Basic	sentinel

Current Boss Metadata Table

Boss	Intelligence
Stone Warden	2 Basic
Splinter Saint	3 Trained
Gravel Maw	2 Basic
Cartouche Widow	5 Cunning
Iron Reliquary	4 Tactical
Mirror Husk	5 Cunning
Ash Comet	3 Trained

Choir of Teeth	4 Tactical
Rust Bishop	5 Cunning
Hollow Star Larva	5 Cunning

Runtime Behavior Effects

Instinctive prey backs away or wanders until endangered. Endangered means damaged in the last 3 seconds or kept very close briefly. Instinctive predators pressure directly. Sentinels hold territory until approached. Mindless enemies use direct or short wandering pressure. Tactical and Cunning enemies receive a small attack-priority bonus while the room budget still limits standard enemy attack starts.

Save/Continue Compatibility

Encounter saves snapshot resolved intelligence and disposition values beside spawn kinds. Continue restores exact values by spawn index. Legacy saves without M72 fields fall back to current catalog defaults. Runtime instinct timers reset on Continue.

Remaining Limitations And V3 Recommendations

M72 adds no pathfinding, line of sight, squad coordination, or boss behavior changes. V3 should revisit richer movement intents only after base combat readability and room-clear pacing are stable. Low-intelligence fleeing remains short and readable so room clears do not become hide-and-seek.
