

Hollow M48 Content Expansion Lock V1

Team handoff for Martin and Rafal - generated from the M48 content lock report.

Executive Summary

M48 locks the first larger playable content pool without adding new mechanics. It adds five approved Room Designer-compatible rooms, mirrors them into the curated Room Designer library, extends the M46 encounter director catalog with eight new encounter templates, and wires normal runs plus M47 challenges to the successor catalog.

Catalog ID	m48_content_lock_encounter_catalog_v1
Approved rooms added	5
New encounter templates	8
Total encounter templates	22
Runtime branch identity	m46_encounter_director_curve_v1
Starter safety	Origin/prologue rooms remain empty: no enemies, no rewards, no hazards.

Approved Room Additions

Runtime Room ID	Footprint	Gameplay Purpose / Notes
approved_cover_arena_single_1x1	1x1	Cover arena with light barrels and spike pressure. Good early combat readability check.
approved_pressure_lane_wide_2x1	2x1	Horizontal lane/gauntlet with charger anchors, barrels, pits, and spikes.
approved_turret_spire_tall_1x2	1x2	Vertical turret room with pits/spikes and flying anchors.
approved_hazard_quadrant_block_2x2	2x2	Macro hazard quadrant with mixed hazards and explosive barrel chain opportunities.
approved_ambush_l_3cell	L 3-cell	L-room ambush with safe traversal gaps, splitter pressure, and charger pressure.

Encounter Catalog Additions

Encounter ID	Intent
m48_cover_scramble	Small-room cover movement with chasers, fast pressure, and flying angle pressure.
m48_lane_pursuit	Lane pressure built around chargers and fast enemies.
m48_turret_spire	Turret/flying vertical-room pressure.
m48_splitter_pit	Splitter pressure with pit-safe flying support.
m48_barrel_chain	Macro room pressure that rewards awareness around barrel chains.
m48_reward_hazard_guard	Reward-room guard template with hazards as positioning pressure.
m48_world2_pressure_mix	World 2 mixed pressure template using charger, turret, splitter, and fast enemies.
m48_world3_hazard_macro	World 3 macro pressure template at the six-enemy cap.

Team Handoff Checklist

Martin - programming/content validation

- Run Milestone48Validator after PDF generation and keep M45-M47 validators accepting successor wiring.
- Smoke normal New Run and at least one M47 challenge to confirm the M48 encounter catalog is active.
- Open the Room Designer library and verify the new curated M48 rooms appear as editable-copy sources.
- If a room is improved manually, export the validated bundle and promote the runtime JSON through DesignerApproved intentionally.

Rafal - room/art review

- Open each M48 curated room as an edit copy and review readability in Graybox and Scene preview modes.
- Prioritize visual clarity for spikes, barrels, explosive barrels, pits, cover rocks, and enemy silhouettes.
- Treat these rooms as gameplay data. ArtPass prefabs should stay visual-only and never own collision or damage.
- Use the new rooms as target scenes for testing material, model, VFX, and lighting direction.

Validation Evidence Targets

- All five M48 rooms import through HollowRuntime V2 and preserve footprint, safe start, door ports, hazards, barrels, enemy anchors, and reward marker.
- Curated Room Designer drafts exist for every M48 room and recompile/reimport successfully.
- The M48 catalog contains all M46 encounters plus exactly eight M48 templates, all using existing spawn kinds only.
- Seed sweep confirms M48 rooms and encounters can actually be selected by directed branch generation.
- Game scenes reference the refreshed room catalog and M48 encounter catalog while preserving the M46 director profile.

Generated Files

- Assets/_Hollow/Data/Rooms/DesignerApproved/approved_* M48 runtime JSON files
- Assets/_Hollow/Data/Rooms/DesignerDrafts/CuratedRuntime/curated_approved_* M48 roomdesigner JSON files
- Assets/_Hollow/Data/Encounters/M48/EncounterCatalog_M48.asset and eight M48 encounter assets
- output/reports/m48_content_expansion_lock_v1.json
- output/reports/m48_content_expansion_lock_v1.md
- output/pdf/Hollow_M48_Content_Expansion_Lock_V1.pdf

M48 intentionally adds no new gameplay mechanics, enemy kinds, reward kinds, room roles, challenge rules, or save fields. This is a content lock and handoff milestone.
