

M57: Developer Lab Coverage Lock

Generated UTC: 2026-05-01T00:42:29.486813+00:00

Status: Fallback report generated outside Unity because batchmode was blocked by Unity licensing initialization.

Action: Re-run Hollow/Generation/Generate Milestone 65 Assets from Unity to replace these fallback reports with asset-scanned reports, BetaContentLock_M63.asset, and BetaQaChecklist_M64.asset.

This document is useful for handoff/planning, but it is not a passing Unity validation report.

Source Notes

M57 turns the Developer Lab into the official inspection route for visible entities.

- Every `PresentationPrefabRole` receives a coverage entry.
- Entries map to Developer Lab rooms and debug-spawn inspection modes.
- Reports show binding status so missing/fallback/unsafe ArtPass targets are visible without normal-run testing.
- Generator output: `output/reports/m57\_developer\_lab\_coverage.\*` and `output/pdf/Hollow\_M57\_Developer\_Lab\_Coverage\_Lock.pdf`.
