

M61: Room Pool Quality + Room Designer Approval Workflow

Generated UTC: 2026-05-01T00:42:29.486813+00:00

Status: Fallback report generated outside Unity because batchmode was blocked by Unity licensing initialization.

Action: Re-run Hollow/Generation/Generate Milestone 65 Assets from Unity to replace these fallback reports with asset-scanned reports, BetaContentLock_M63.asset, and BetaQaChecklist_M64.asset.

This document is useful for handoff/planning, but it is not a passing Unity validation report.

Source Notes

M61 turns room editing into a safer approval pipeline.

- Draft: editable Room Designer/local/profile copy.
- Reviewed: exported runtime JSON passes validation and manual smoke.
- Approved Runtime: copied into DesignerApproved and included in curated drafts.
- Validate safe starts, doors, hazards, chest markers, enemy anchors, boss endpoints, and ArtPass preview before promotion.
