

M65: Beta Handoff Build + QA Pack

Generated UTC: 2026-05-01T00:42:29.486813+00:00

Status: Fallback report generated outside Unity because batchmode was blocked by Unity licensing initialization.

Action: Re-run Hollow/Generation/Generate Milestone 65 Assets from Unity to replace these fallback reports with asset-scanned reports, BetaContentLock_M63.asset, and BetaQaChecklist_M64.asset.

This document is useful for handoff/planning, but it is not a passing Unity validation report.

Source Notes

M65 packages the beta QA handoff.

- Required routes: New Run, Continue, Challenge, Developer Lab, Room Designer, Boss Lab, shop, chest, boss clear, and next-world portal.
- Handoff artifacts: Windows build when supported, VisionOS readiness notes, controls sheet, known issues, Rafal ArtPass checklist, and tester instructions.
- Build or device blocks must be explicit, never silent.
